

Controller Transfer (HC2 to HC3)
FIBARO WEBINAR TRAINING

Before you Start

What will be transferred

- Sections and Rooms
- Z-Wave devices
- Z-Wave device parameters
- Camera devices (not ones created using plugins)
- Direct Associations

What won't be transferred

- Scenes
- Plugins
- Energy consumption metering
- Virtual devices
- Schedules (Watering, Climate)

Preparation

NOTE:

The migration Process is irreversible

FIBARO ID

TYPE	NAME	SHARING	ACCESS	
	HC3-00005016	0 Users	Owner	
	Office	0 Users	Owner	

Both the Source controller (HC2) and the Target gateway (HC3) for the transfer need to be linked to the same FIBARO ID Account

Controller Firmware's

The Source Controller (HC2) must be on firmware version 4.581 or Higher

The Target controller (HC3) must have version 5.021 or higher

Beginning Transfer

First Steps

- Create Cloud Back-up of the controller
- Note down actions for Scenes as they will not be transferred.

- No Steps Needed

Start the Transfer

1 SOURCE HOME CENTER

2 TARGET HOME CENTER

[Back To HC List](#)

The Transfer has a couple of parts that will prompt you to confirm for each step.

Thank you!
